Static SEO Landing Pages  
 Printer Friendly Pages Generator  
 Mobile/WAP Site Builder

**Don't fool yourself into believing Mod\_Rewrite, ISAPI\_Rewrite or a plain dynamic URL will get you to Google's first page.**

Search3w.com utilizes a unique proprietary technology for greater site visibility, search engine optimization and usability.

Thousands of keywords published on thousands of web pages link to each other using "MIT's Ring Theory". Many top ten Google websites use this technique - Overstock, BizRate, ePinions, Amazon and more.

This approach generates four components: static highly-optimized HTML pages, printer-friendly pages, mobile site pages and XML sitemap feeds. Our streamlined implementation uses simple XML configuration files -giving webmasters and users full control of their site optimization.

**Our products does not employ duplicate pages, doorways or other SEO tricks. We won't get you banned by Google.**

Actually, we'll build you an optimized website that meets the US General Service Administration's accessibility requirements.

Want to learn more? Respond to this email to establish your project scope, learn more about the process and discover our incredibly reasonable license fees.

**One click converts thousands of web pages into SEO-optimized pages**

**7 years of experience converting dynamic websites to search engine friendly static sites!**
